

LOGISTICS UK

Vision

The Leading Driver and Fleet Compliance Platform

Take Control of Your Compliance

Vision is the leading driver and fleet compliance platform, developed by the industry experts in compliance.

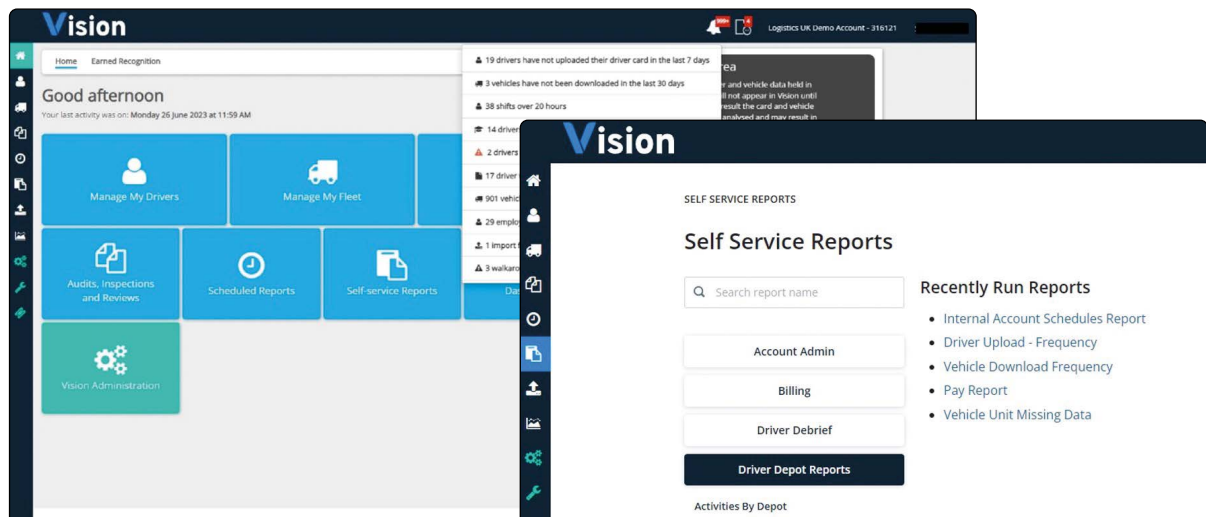

Logistics UK has developed a powerful platform that allows users to manage their driver and fleet compliance via a single log in. Born from decades of experience leading the industry and our clients'

driver and fleet compliance, Vision has been specifically designed to leverage insights to **drive efficiency, cut costs, increase performance and reduce risk.**

Combined Vision

Incorporating industry leading services provided by Logistics UK including **Tachograph Analysis, Vehicle Inspection Service (VIS), Training, PCN Management Service, Collision Data Tracking and Driver Licence Checking**, Vision provides our clients with a platform through which these services work together, for you. Users gain greater

insight through the amalgamation and analysis of data through a single platform. Vision also offers integration with third party data, such as telematics and remote downloads, to feed critical compliance-related data into the system for storage, analysis and management.

Industry Leading Services Under One Roof

Vision combines data from Logistics UK's outstanding individual services to deliver increased total value.

Training

Automatically record driver training records and benefit from handy alerts set up to track your Driver CPC programme.

PCN Management Service

Logistics UK's PCN Management Service monitors, administers and challenges PCNs issued to your company. Vision's individual driver profiles reduce administration time.

Driver Licence Checking

Integrated with Licence Bureau, the country's leading provider of secure driver licence checks, Vision minimises time and risk associated with checking whether your drivers are safe and legally compliant to drive.

Collision Data Tracking

Collision information for a particular driver is displayed in the driver profile and included on the performance overview.

Tachograph Analysis

Analysing millions of driver days each year, we crunch the data, letting you see what matters in our fast, intuitive cloud-based platform.

Vision Uploader

Created for simpler, easier uploading of data and 'quick check' instant analysis of a driver card.

Tachograph Analysis

Tailor and schedule detailed reports which deliver critical visibility on infringements and areas of development.

Compliance Service

Our team of on-site advisors are on hand to support your tachograph and administrative compliance.

Systems Audits

Intricate checks on the systems in place to deal with driver management, drivers' hours compliance and working time rules.

Vehicle Inspection Service

Through our industry-leading Vehicle Inspection Service, vehicles Logistics UK has inspected have, on average, 66% less wheel defects and 57% less brake defects compared to the national average.

Interactive Reporting

Explore both grid and graphically-led reports, making it easier to identify potential issues. Our reports save you time and money and reduce risk.

Systems Audits

Detailed auditing procedures give you confidence in your operations' efficiency and compliance, whilst highlighting areas for improvement.

Benchmark Your Fleet

Benchmark against like for like operators, internally, regionally or nationally using OCRS or our Audit Points Graph.

Deep Dive

Use our fleet dashboard to provide overarching data or deep dive into individual vehicle information.

Platform Overview

Vision's intuitive user interface and powerful analytics tools make it faster and easier than ever to manage, control and analyse your data.

Homepage

A clean and intuitive homepage displays relevant major services, alerts and options.

Manage My Drivers

View the status of all drivers with clear identification of compliance-related issues.

Individual Driver Profiles

Gain quick access to all personnel and assign key information to profiles, including PCNs, infringements and training records.

Manage My Fleet

Vision provides a bird's eye view of your entire fleet with quick access to critical information, such as completing the loop between identification of defects and sign off.

Vehicle Information

Access individual vehicle information with one click. Vision stores historical information and provides key information specific to each vehicle.

Alerts

Tailor profiles to receive specific alerts, resulting in more efficient management, self-management and time saving.

Debrief

Manage driver infringements and electronically demonstrate evidence of O licence compliance.

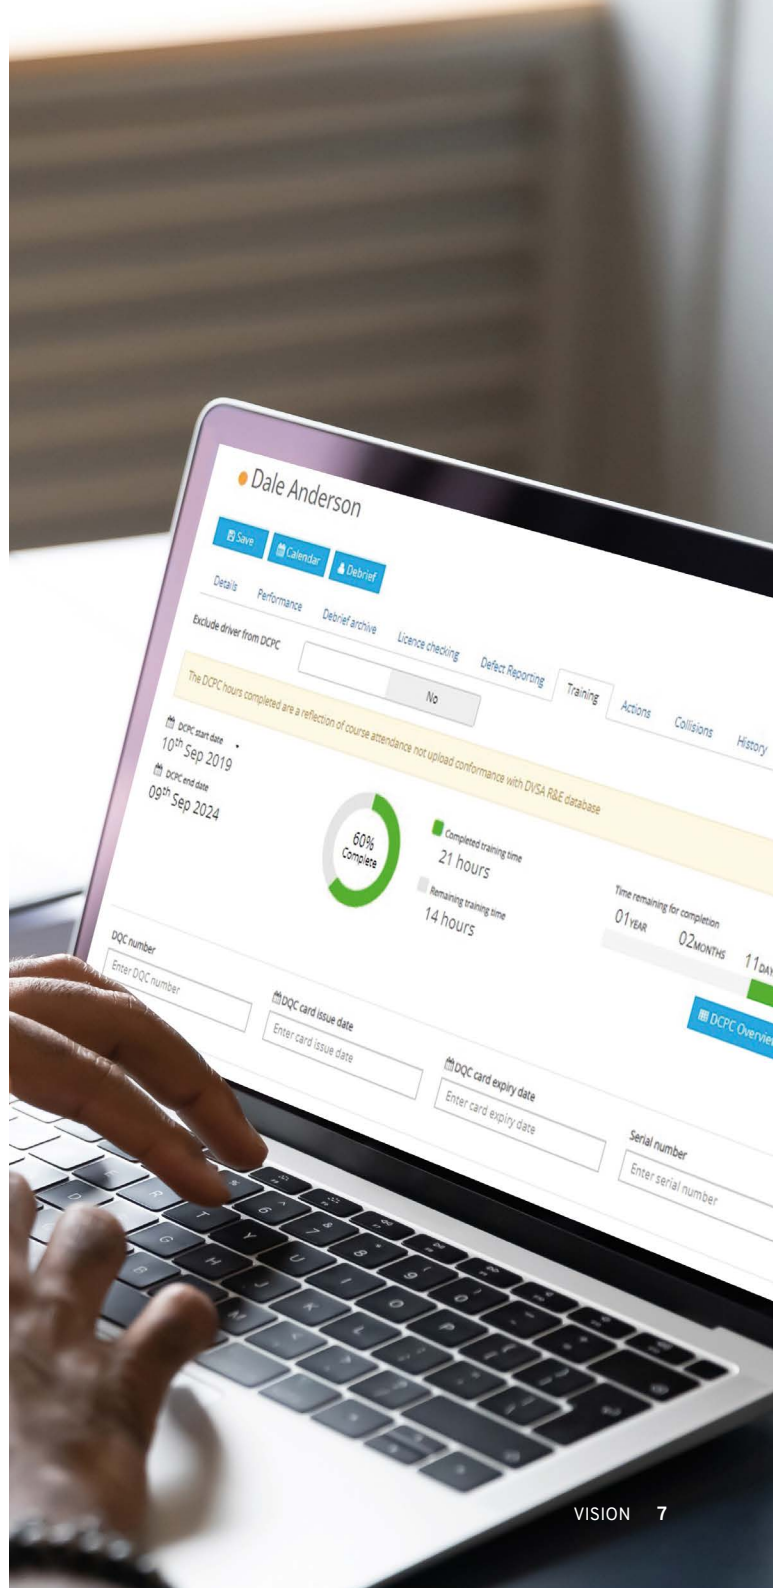

Performance Benchmarks

Vision brings together important Business Intelligence in easy-to-understand dashboards, contrasting company performance on infringements and defects with industry averages across the country, region, sector or even depot.

Move Forward With Vision

Vision goes above and beyond in our mission to deliver an unparalleled driver and fleet compliance service. The combination of our core services in a single platform means that operators can collate, manage and benchmark data both internally and externally, across multiple locations and peer groups.

Use the power of Vision to combine first class individual services and gain greater total value through the collaboration of data. Vision is here to drive efficiency, cut costs, increase performance and reduce risk.

“ The quick overview of driver activities during a shift (ie summary of drive, work, POA) without having to navigate away from the screen means it is a lot easier to keep track of drivers’ daily and weekly drive times to help when planning drivers’ work. Multiple manual entry capability across drivers means that this can be done in minutes rather than the cumbersome task of entering data daily and the simple key makes it clear what the entry is for.

The biggest thing for me is the whole look of the new software – it shows how Logistics UK is evolving with technology to supply members with a modern system to manage drivers’ hours and monitor vehicle activity, bringing the software up-to-date with competitors and opening up the possibilities for additional features in the future. ”

Anna Griffin, Fleet & Compliance Manager, TJ Morris Ltd
