Welcome to Logistics UK's Supply Chain Resilience

David Wells OBE
Chief Executive
Logistics UK

A handwritten signature in black ink, appearing to read 'David Wells', with a horizontal line underneath.

Welcome to the thought leadership event for senior decision makers in the logistics industry.

In recent years, we've faced unprecedented disruption to supply chains in ways never seen before that have highlighted just how critical logistics is to the success of business in the UK.

Over the course of today's proceedings, our experts will arm you with the insight needed to navigate future challenges, plan your business strategy, protect your operations against global and national supply chain pressures and maximise the opportunities of emerging technologies.

We'll delve into some of the Government initiatives dedicated to enhancing the resilience of the UK's logistics operations and domestic and international supply chains.

We'll address the importance of achieving maximum visibility of your supply chain, from both a goods movement and supplier management perspective.

We'll explore the various strategies that logistics businesses can employ to effectively mitigate both global and local risks stemming from an ever-changing business landscape.

We'll share an approach to resilience modelling and tell you how it can be applied to your supply chain.

We'll uncover the intricate dynamics surrounding the sustainability of just-in-time logistics, its key considerations for manufacturers and retailers, and how it aligns with broader objectives.

We'll discuss real-world examples and best practices to guide businesses in building a more robust and adaptable transport system.

And we'll examine today's landscape of interconnected and technologically-driven supply chains and the importance of cyber security.

There's lots to digest, so stay refreshed, get involved where you can and enjoy the day

It's a pleasure to welcome you.

<https://www.arup.com/>

Dedicated to sustainable development, Arup is a collective of designers, consultants and experts working globally. Founded to be humane and excellent, we collaborate with our clients and partners using imagination, technology, and rigour to shape a better world. Our primary goal is to offer design and advisory consultancy services targeted at developing a truly sustainable built environment. Our work on decarbonisation spans across developing policy, corporate strategy and business cases for investments in assets (warehouses, technology, vehicles, infrastructure, etc), and operational and cultural changes required to deliver decarbonisation.

<https://cnsonline.co.uk/>

Community Network Services (CNS) has been supplying digital trade solutions to the ports and logistics sector since 1986. We make trade faster and simpler for our customers and ports and logistics communities, enabling smarter trade and ensuring compliance with ever-changing regulations.

The CNS software products include port community system and a suite of customs declaration management tools. Designed to provide users with the latest technology enabling easier, more efficient operations and resilient supply chains. Our world-class support helpdesk is available 24/7.

<https://www.endava.com/>

Technology is our how. And people are our why.
For over two decades, we have been harnessing technology to drive meaningful change. By combining world-class engineering, industry expertise and a people-centric mindset, we collaborate with our customers to create technological solutions that drive innovation and transform businesses.

Get things moving!
Across the supply chain, transport and logistics businesses are under mounting pressure to move goods faster than ever before. But outdated systems and staff shortages have left many at the mercy of contingencies. Endava helps you employ digitalisation, automation and data analytics to take back full visibility of your operations, and we build systems that enable you to deliver goods promptly, safely and sustainably.
