

# Turning a van into a workspace

work smart bott

## Why choose bott?

From simple van racking, to more complex on-board technology, power generation and vehicle branding – bott has the expertise to deliver van conversion solutions to fit your needs.

## Capability and scale

Sites in Scotland, the Midlands and Cornwall handling thousands of vehicles a year for fleets of all sizes. A fully integrated service including design, UK racking manufacture and installation, electrical equipment and van graphics.

## Customer support

Through understanding your needs to provide fit for purpose solutions. Peace of mind support from a dedicated account manager and experienced project team.

## A team of experts

Extensive experience in specification design, electrical development, decals and operations, underpins the bott conversion process and provides a valuable source of technical support.

## Safety and compliance focussed

Creating a safe workspace is paramount at bott. Our in-house Compliance Team oversees this and Type Approval checks. bott are also proud to be Logistics UK Van Excellence Gold Partners.

## Industry wide network

Building knowledge and connections through long term partnerships with manufacturers, leasing companies and suppliers to help support you and your business.

## Quality without compromise

Designed to be durable, our van racking is crash tested and electrical equipment rigorously assessed to minimise in-service issues, making a bott conversion a sound long term investment.
