

# Vehicle Inspection Service COVID-19 Response

Leading UK  
Logistics

## Keep your operation legal, compliant and safe. Book your **contact-free inspection** today

In response to an increasing number of reports from FTA members that they are struggling to book statutory vehicle inspections with local garages due to staff shortages during the COVID-19 pandemic, FTA would like to reassure operators of commercial vehicles that our Vehicle Inspection Service (VIS) will remain operational throughout the crisis.

FTA have made alterations to our inspection processes to ensure that we are still able to deliver the services that keep your operation legal, compliant and safe whilst minimising the risk of infection for our engineers and our clients.

FTA's VIS is available to both members of FTA and non-members alike. The team of engineers covers the UK and Republic of Ireland and works with some of the biggest names in logistics across a wide range of industry sectors such as retail, construction and 3PL (third party logistics) operations.

The wide extent and type of vehicle inspections carried out by FTA's VIS range from vans and heavy goods vehicles (HGVs) to buses and specialist lifting equipment. And our National team can come to you. All the inspections delivered in the UK are accredited by United Kingdom Accreditation Service (UKAS).

We have taken measures to ensure our VIS service can be carried out with no contact between client's staff and our engineers. These measures include:

- Delivering inspections at a site of your choice – such as a service provider – as long as the normal safe working environment for an inspection can be maintained.
- No need to physically meet with client's staff on site – we can collect and return vehicle keys from a pre-arranged secure location, deliver reports by email and conduct post-inspection discussions by phone. Keys can be sanitised before return.
- Our engineers will use a new pair of disposable gloves from the moment they enter to the moment they exit your site.
- Supplementing your staff, where you have shortages, with our engineers carrying out mandatory inspections and minor run repair services (non UKAS accredited).
- Making our engineers available for weekend inspections.
- Bespoke service combinations to suit your fleet needs.

*Subject to trading conditions and operational availability*
