LOGISTICS UK

Gleaner transforms compliance in heavily regulated fuel distribution sector

Summary

Gleaner, a leading fuel distribution company, employs over 250 staff and operates 38 HGVs, including 33 oil and gas tankers, across nine depots throughout Scotland. It faced significant compliance challenges related to managing driver infringements and a time-consuming manual debriefing process. Vision has streamlined administrative processes, transformed driver activity monitoring and the platform's advanced reporting, alerts, and tracking features have significantly improved decision-making, training and overall compliance.

The Challenge

Fuel distribution is significantly more regulated than general HGV transport and requires adherence to hazardous material laws and strict safety protocols. In this heavily regulated sector, safety is Gleaner's top priority and the organisation needed a solution to improve driver performance and enhance its overall compliance scores compared to national haulage and oil distribution companies.

The Solution

Gleaner implemented the Logistics UK Vision platform to streamline management of its fleet's digital tachographs, while the Fleet Inspection Dashboards provided real-time visibility into vehicle inspections conducted as part of the comprehensive Vehicle Inspection Service. The company has successfully streamlined its operations, improved driver compliance and reduced administrative workload.

Gleaner

20/20 Vision

- **Increased compliance awareness**
- **Proactive tracking ensures regulatory adherence**
- **Automated processes save time and reduce errors**
- **Real-time insights enable better scheduling and resource allocation**
- **Safety reinforced as a core operational focus**
- **Vision is an integral part of compliance processes**

Real World Impact

Vision provides essential daily and weekly insights into driver activity, enabling Gleaner to take informed and legally compliant decisions regarding driver schedules, particularly for weekend work. The immediate access to data allows for quick analysis and ensures regulatory adherence.

Vision's online reporting system has transformed operational processes and company policies at Gleaner. It enables proactive monitoring, facilitates targeted training and supports ongoing driver development.

Logistics UK's Member Advice Centre (MAC) supports Gleaner with technical compliance queries and the Vision support team ensure Gleaner receives appropriate and timely guidance needed to ensure it maximises the platform's functionality.

The audit process has been instrumental in improving compliance and operational efficiency and the insights gained from this process helps Gleaner refine and improve its processes.

The platform's dashboard can be tailored to show the precise data relevant to Gleaner and presents it visually enabling non specialists to quickly see and understand the status.

Vision allows Gleaner's traffic office to set up alerts and triggers, enabling proactive decision-making and improving overall efficiency.

Online debriefing has reduced the administrative workload significantly and, previously, managing infringements required a time-consuming process of printing, scanning and manual tracking between depots and the traffic office. Vision now manages the process seamlessly saving Gleaner time and resources.

Vision provides a structured system for monitoring driver performance, including tracking repeat infringements, which enables active steps to be taken to reduce violations and enhance overall operational efficiency.

"Vision helps ensure we remain both safe and compliant with regulations and we consider Logistics UK, and its outstanding team, as trusted partners. We wholly endorse the platform for any business looking to enhance compliance, efficiency, and overall fleet management."

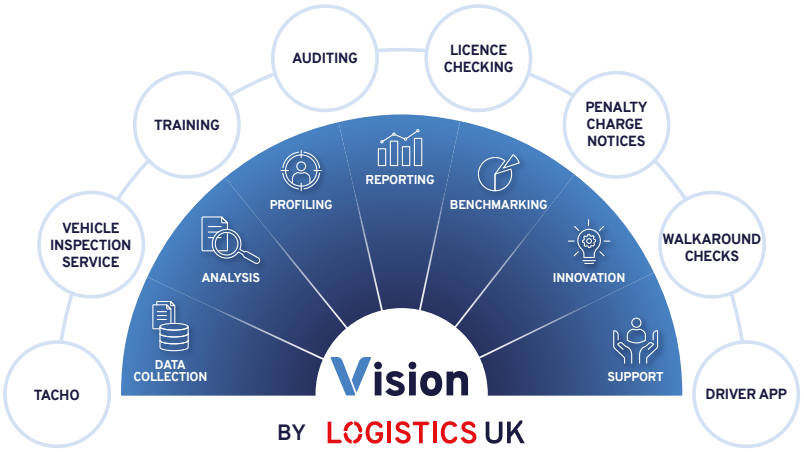

Michelle Cruickshank
Senior Transport Manager
Gleaner Ltd

About

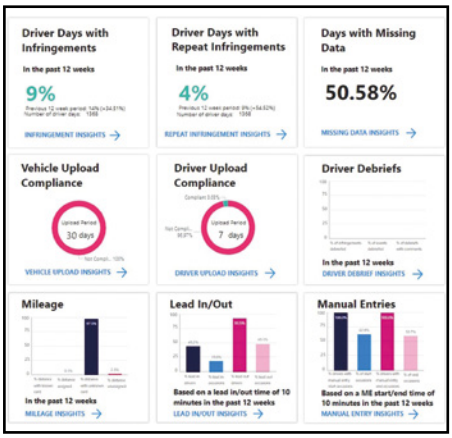

Gleaner is a leading fuel distribution company operating nine depots across Scotland and has been supplying home heating oil, commercial fuels, and agricultural fuels to homes, businesses, and farms for over 70 years. It is committed to sustainability and can provide renewable boiler fuels designed as eco-friendly alternatives to traditional oil and gas heating solutions.

What is Vision?

Logistics UK's compliance software, built for flexibility, precision, and seamless scalability. Vision keeps you ahead of compliance trends with data driven insights, tailored KPIs and human-led support.
